Available for freelance

I'm *Your Name.*

Software Developer · DevOps Engineer · Your City, Your State

I'm a software developer who builds modern, scalable applications. I work with React, Node.js, FastAPI and machine learning to turn ideas into working products, from full-stack development through deployment and automation, with a focus on reliable, efficient and easy-to-use software.

ABOUT

Who I am

I'm a software developer from Your City, finishing a B.E. in Computer Science and Engineering. I build and ship web, mobile and AI-powered applications, from the API and database to the interface.

I'm available for freelance work: full-stack web apps, AI features, and deployment with Docker, AWS and CI/CD. I'm also open to full-time software roles.

I've completed machine learning training and have a solid base in object-oriented programming, SQL, Git, API testing and debugging.

What I can build for you

- Full-stack web apps with React, Node.js and FastAPI
- AI features: LLM integration and machine learning
- Deployment and DevOps with Docker, AWS and CI/CD

Start a project

Template text. Replace every "Your ..." field and the sample details with your own.

TECHNICAL SKILLS

Languages, frameworks, tools

LANGUAGES

Python · JavaScript · TypeScript · Java (basics) · SQL

FRONTEND

React.js · Next.js · HTML5 · CSS3 · Tailwind CSS · Vite · React Router

BACKEND

Node.js · Express.js · FastAPI · REST APIs · API integration

AI AND MACHINE LEARNING

Machine learning · LLM integration · PDF parsing

DATABASES

MongoDB · Mongoose · MySQL · SQLite · Database design

SOFTWARE DEVELOPMENT

OOP · Problem solving · Debugging · Exception handling

TESTING AND TOOLS

API testing · Git · GitHub · VS Code

CLOUD AND DEPLOYMENT

AWS · Vercel · Netlify · Docker · Basic CI/CD

EXPERIENCE

Where I've worked

Internship
Month Year

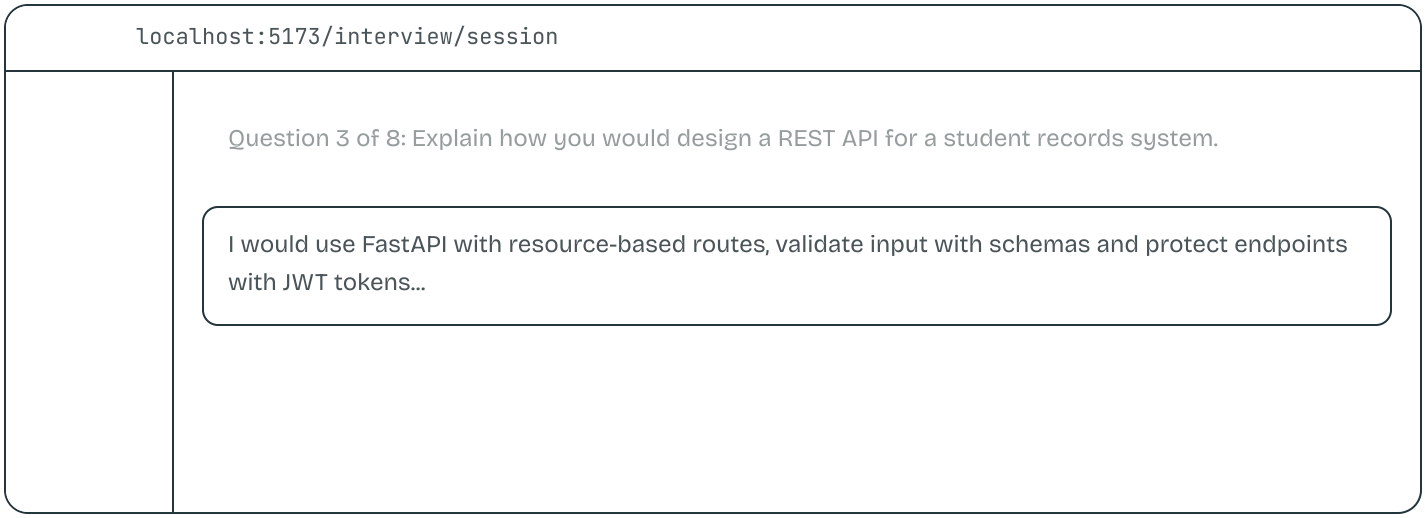

Web Development Intern

Your Company, City

- Completed an internship focused on web development.
- Built web pages using HTML, CSS and JavaScript.
- Got introductory exposure to React.js, Node.js and Bootstrap for user-interface work.

PROJECTS

Selected work

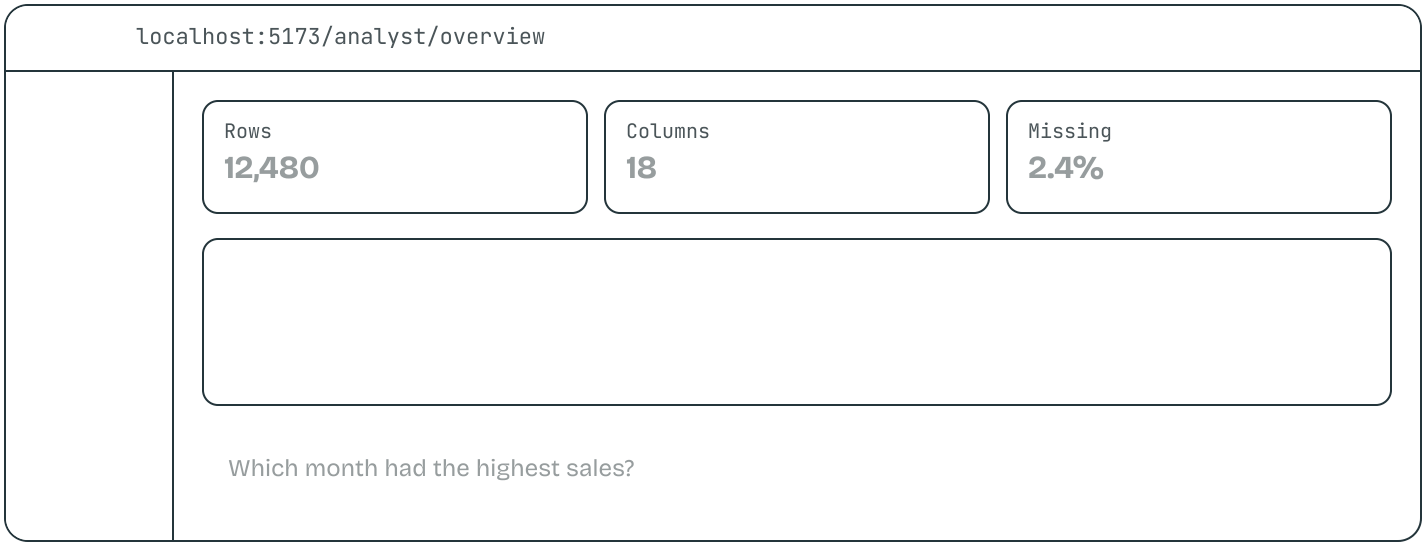

AI Month Year

AI Interview System

- Full-stack interview app with a React.js front end and a FastAPI back end over REST.
- Resume upload with PDF parsing to pull out candidate details.
- An LLM generates interview questions and handles interactive answers.
- MongoDB stores interview and application data.

React.js FastAPI Python Ollama MongoDB

AI Data analysis

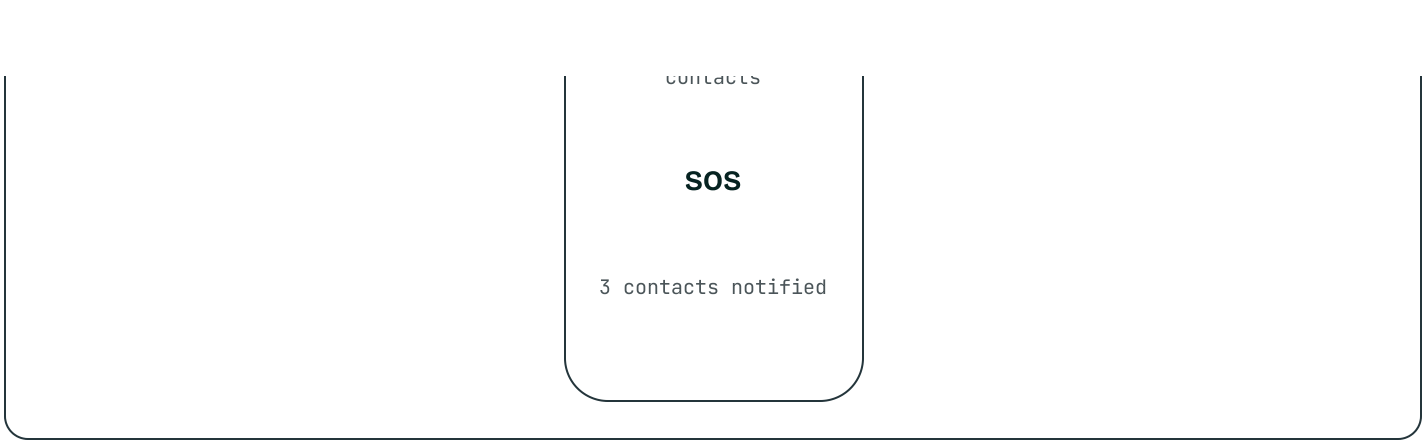

AI User Data Analyst

- Upload a dataset and ask questions about it in plain language.
- Python backend cleans and summarises the data, then returns answers and charts.
- Dashboard-style React interface for exploring the results.

React.js FastAPI Python Pandas

View details →

Mobile Month Year

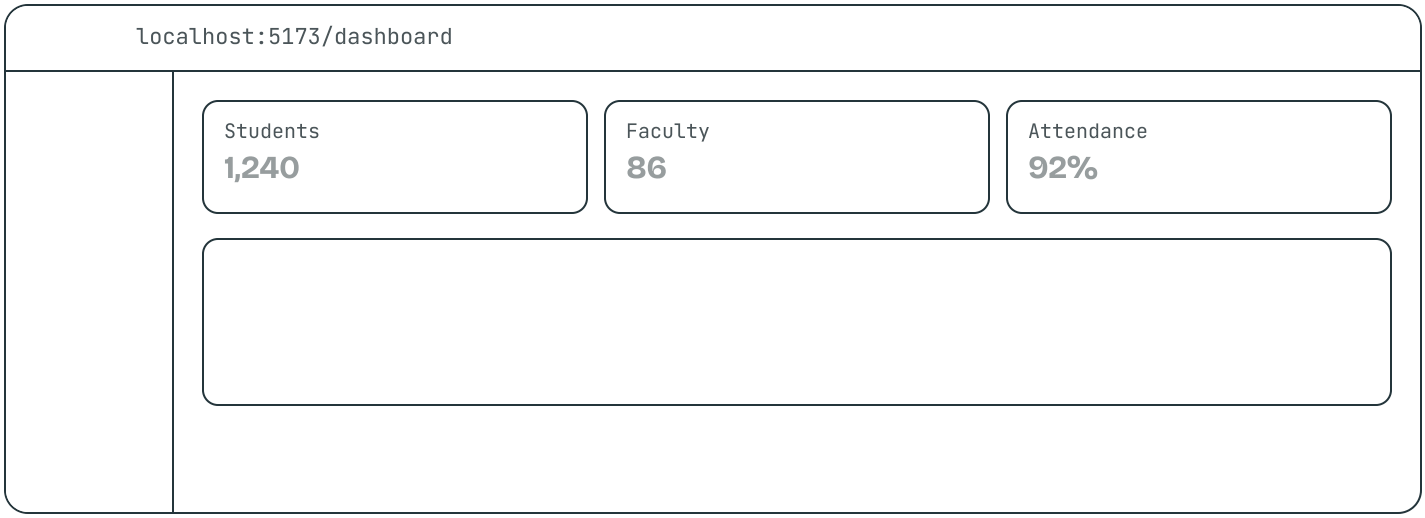

SafeSphere

AI-powered emergency and safety application.

- Flask backend with a SQLite database for emergency and safety features.
- Google Maps API and GPS for location-based features.
- WebSocket communication for real-time updates.

Flutter Dart Flask SQLite Google Maps API WebSocket
